

MBA-0188

Multi-Band UHF Array

DESCRIPTION

The MBA-0188 is a low-profile, dual-port antenna is designed for signal intelligence (SIGINT), radar, and intelligence, surveillance and reconnaissance (ISR) applications.

With an efficiency of over 50% for the aperture across the entire band, it has unparalleled performance.

This versatile antenna can be installed in many locations on an aircraft or on other vehicles. It can be placed both on conductive and non-conductive surfaces; it can be behind a radome or other non-conductive skin. The output of the antenna is a dual linear polarized antenna with horizontal and vertical polarizations available to the user.
